SKILLS

- PHP
- JavaScript
- NodeJS
- Typescript
- React
- Vue, Vuex
- Laravel
- Express.js
- HTML, CSS, SASS
- WordPress
- Git, GitHub Actions
- Docker
- TailwindCSS
- Bootstrap
- Firebase
- MySQL & PostgreSQL
- MongoDB
- Nginx & Apache
- AWS
- CI/CD

EDUCATION

Bachelor of Science (Physics)

University of East Yangon
September 2011

Level 5 Diploma in Computing

NCC Education (UK)
January 2016

Level 4 Diploma in Computing

NCC Education (UK)
April 2014

PROFILE SUMMARY

Experienced Full Stack developer with over 4 years of hands-on experience in building and deploying web applications. Implemented third party service integration and RESTful APIs, managed MySQL databases, and configured production servers. Specialize in PHP, Nodejs, and frameworks like Laravel, Vue, React, and Express.js. Passionate about building impactful applications and continuously exploring emerging technologies and design paradigms to elevate digital experiences.

WORK EXPERIENCE

Full Stack Developer

Mahar NET (ISP) Company | Jul 2022 – Dec 2024

- Significantly contributed to the development of ISP Management System (CRM) and User App Admin Portals using Vue.js and Laravel, delivering complex features.
- Developed and enhanced the backend functionalities for various modules including Customer Management, Service Provision, Plan Change, Complaint Ticketing, Sales Care and Reporting resulting in a 25% improvement in the functionality of applications.
- Delivered new features and enhancements while actively resolving bugs and improving system stability, optimized user experience for web portals.
- Implemented high-performance RESTful APIs, resulting in a 30% reduction in average latency for data exchange between frontend and backend systems.
- Supported in new updates deployment on Linux-based server environments, and implemented logging strategies to enhance reliability and ensuring high availability.
- Implemented OAuth authentication using Laravel Passport and integrated third-party APIs (Splynx) for MPlus management system.
- Used Vuex for centralized state management, streamlining data flow across the frontend, leading to 16% reduction in user-reported interface issues.
- Optimized SQL queries of slow loading APIs of the applications, resulting in a 18% improvement in performance and a 10% reduction in load times to ensure faster and smoother user experience.

Senior Web Developer

AEG Company | Apr 2021 – May 2022

- Utilized Laravel and PHP expertise with MVC design patterns to develop multivendor e-Commerce solution and e-learning management system.
- Integrated third party VR platform into company's e-Commerce project and implemented RESTful APIs to ensure seamless data exchange between systems for Virtual Reality shopping experience.

CERTIFICATES

Web Developer Bootcamp

Myanmar IT Consulting
November 2019

Talent Program

ACE Data Systems Group
September 2019

Practical Advanced Java

Acroquest Myanmar Technology
October 2016

LANGUAGES

- Burmese (Native)
- English (Intermediate proficiency)

- Designed and implemented projects architecture, defined technical stacks, and collaborated with clients, development teams, and stakeholders to clarify requirements and deliver effective solutions.
- Designed user-friendly Portal interfaces and Admin UI improving user experience by 16%.
- Supported the migration of government web applications like MHSRJ and DMR from a legacy VPS domain to a new hosting environment, ensuring seamless deployment and functionality across updated server configurations.
- Mentored junior developers and provided software training, improving team satisfaction by 14%.

Web Developer

GIGA Link Technology Company | Jan 2020 – Mar 2021

- Developed the user-friendly platforms of different domains such as education, travel, fitness and e-commerce using CMS framework like WordPress, Drupal and Magento.
- Leveraged diverse expertise in CSS, JavaScript, Ajax and PHP to deliver dynamic, interactive websites, achieving 20% increase in client satisfaction.
- Delivered pixel-perfect UI design for every project by collaborating with UI/UX teams, achieving 97% design accuracy
- Applied industry best practices to deliver customized content management systems that enhanced client expectations, earning positive feedback and repeat business.
- Maintained and deployed websites on production, proactively identifying and resolving issues to ensure site stability and reliability.

PERSONAL PROJECTS

Mern Chat

Description: Developed this Real-time chatting app with Mern Stack. The features include real-time messaging, filter active users, file upload, and user setting functionalities. Built with JWT authentication and Zustand for state management.

Tech Stack: Express & Node.js, MongoDB, React, Socket.io, Daisy UI

Projix

Description: Built a project management application with a backend in Laravel. It includes admin panel that allows administrators to create, modify project and task, assign tasks, and manage team members. Members have separate access to view detail, filter and complete tasks. The application is deployed on AWS Cloud.

Tech Stack: Laravel, React with Inertia, Laravel Breeze, Tailwind CSS, AWS

Smart Spender

Description: A finance tracker web application using TypeScript for the frontend and NodeJS for backend. This project allows users to manage personal income and expense, view and search for their personal financial records. It integrates Clerk for Social Login functionality, delivering a seamless and engaging user experience.

Tech Stack: Node.js, Express, TypeScript, React, MongoDB

Portfolio

Description: Built portfolio with animation using Next JS and Framer Motion. Utilized UI libraries such as Daisy UI and Tailwind CSS.

Tech Stack: Next JS, TypeScript, React, Tailwind CSS
